SUBJECT: SCE PSPS Post Event Report - October 23 to October 28, 2020

Dear Director Palmer:

Southern California Edison (SCE) respectfully submits the attached report in compliance with the Public Safety Power Shutoff (PSPS) Post Event Reporting requirements regarding its PSPS event that began October 23, 2020 and ended October 28, 2020.

This report has been verified by an Officer of SCE in accordance with Rule 1.11 of the Commission's Rules of Practice and Procedure.

Sincerely,

DocuSigned by:

29E9CB7BDB43475...

Diana S. Gallegos

**Southern California Edison
Public Safety Power Shutoff Protocol (PSPS)
Post-Event Reporting in Compliance with Resolution
ESRB-8 and PSPS OIR Phase 1 & 2 Requirements
October 23 to October 28, 2020**

**Submitted to:
California Public Utilities Commission
Director of the Safety and Enforcement Division
November 12, 2020**

Executive Summary

On October 23, 2020, Southern California Edison (SCE) activated a hybrid¹ Incident Management Team (IMT) to manage forecasted increased fire danger conditions that included Santa Ana winds forecasted by SCE meteorologists and the National Weather Service in Fresno, Los Angeles, Orange, San Bernardino, Riverside, and Ventura counties, which were initially forecast to impact the SCE service territory at approximately 9:00 am on October 26 and continue into October 27. However, on October 26, hazardous weather conditions, including wind up to 96 mph as measured by weather stations in Valencia, developed several hours ahead of the forecast of 9 am. This unexpected onset of extreme weather required immediate use of PSPS to maintain public safety beginning at approximately 6:23 am on October 26.² During this event, SCE also de-energized circuits not previously forecasted to be in scope for PSPS due to the wind conditions observed by meteorologists and weather stations in Los Angeles, San Bernardino, and Orange counties.

Ultimately, SCE proactively de-energized 36,307 customers in areas of Kern, Ventura, Los Angeles, San Bernardino, Orange, and Riverside counties. Power was restored to all proactively de-energized customers on October 28 by 3:24 pm, except for 986 customers on the Atento and Taiwan circuits within Orange County that were affected by the Silverado Fire as detailed below in this report.

SCE submits this report to demonstrate its compliance with the directives of Resolution ESRB-8 and the California Public Utilities Commission (CPUC or Commission) PSPS Order to Institute Rulemaking (OIR) Phase 1 (Decision (D.) 19-05-042) and Phase 2 (D.20-05-051) requirements associated with PSPS events. This report explains SCE's decision to call, sustain, and conclude a de-energization event and provides both a summary of the event and the responses to the post-event questions as required by the Commission.

SCE appreciates that PSPS de-energizations pose significant challenges and hardships for its customers and the Public Safety Partners that provide vital services to our communities. SCE recognizes that this is particularly true when the unexpected onset of dangerous weather and fuel conditions requires that SCE take actions quickly and without all the advance notifications contemplated by the CPUC. SCE's decision to activate its PSPS protocol is based on careful consideration of multiple factors, including forecasted weather, fuel conditions, and impacts to Public Safety Partners and the communities we serve. Because SCE takes seriously its responsibilities and understands the impacts of de-energization events, SCE only uses PSPS de-energization when it believes that there are no other reasonable alternatives to mitigate identified risks to public safety that would result from catastrophic wildfire.

SCE remains committed to continuously improving its processes and welcomes input from its customers, Public Safety Partners, community representatives, and local governments on ways we can work together to enhance the existing processes, improve communication and coordination amongst impacted entities, and minimize the impact of PSPS events on all stakeholders.

¹ SCE's IMT operated both remotely and in-person at the SCE Emergency Operations Center (EOC).

² There were also wind-related outages in SCE service territory that were not caused by PSPS de-energizations that are not included in this report.

SCE took the following actions to manage its response during the PSPS event:

1. Activated a dedicated PSPS IMT to coordinate response operations associated with the potential use of PSPS to maintain public safety. The IMT was activated and utilized a hybrid approach of remote and in-person response in adherence with COVID-19 protocols.
2. Utilized ES IMT resources activated under the Incident Support Team for the Silverado Fire restorations to perform restoration activities on the Atento and Taiwan circuits
3. Reached out to the Geographical Coordination Center (GACC)³ to coordinate regarding its expectation for fire potential over the course of the PSPS event.
4. Provided notifications Public Safety Partners, critical infrastructure providers, the CPUC, the California Department of Forestry and Fire Protection (CAL FIRE), the California Governor's Office of Emergency Services (Cal OES), and affected SCE customers. Additionally, SCE provided notices Community-Based Organizations (CBOs), such as Independent Living Centers (ILCs), the American Red Cross, 2-1-1, and Fire Safety Councils.
5. Initiated operating restrictions on impacted circuits, as applicable.
6. Performed field patrols of impacted circuits where possible in preparation for the potential use of PSPS.
7. Opened Community Resource Centers (CRCs) and deployed Community Crew Vehicles (CCVs) to impacted communities.
8. Performed live field observations of monitored circuits as required during the period of concern to validate actual weather conditions and the need for the use of PSPS for de-energization.
9. Performed post patrols to verify no damage to de-energized circuits in support of restoration activities.

³ The GACC is the physical location of an interagency, regional operation center for the effective coordination, mobilization, and demobilization of emergency management resources. A coordination center serves federal, state and local wildland fire agencies through logistical coordination of resources throughout the geographic area, and with other geographic areas, as well.

Event Summary October 22 to October 28, 2020⁴

October 22nd -- SCE's weather services team notified SCE's Business Resiliency Duty Manager (BRDM) of a weather system that was forecast to bring Santa Ana winds and low humidity levels for most of the SCE territory beginning October 26 and continuing through October 27. The decision was made to activate the PSPS IMT on October 23 at 10:00 am. Initially, SCE identified 64 distribution circuits and approximately 82,675 customers in scope for the potential PSPS event.

October 23rd -- SCE sent the CPUC an email at 10 am to communicate activation of the Public Safety Power Shut Off Incident Management Team (PSPS IMT). SCE also held a State Executive call at 2:00 pm, and an OEM County Coordination call at 3:00 pm to communicate the weather forecast, potential customers in scope and answer any questions regarding the PSPS event. SCE sent notifications to public safety partners and critical infrastructure providers at 1:40 pm with respect to circuits projected to be in scope for the event. SCE also dispatched pre-patrol resources to begin inspecting circuits in scope for the PSPS event.

October 24th -- SCE held its daily State Executive call at 2:00 pm, and an OEM County Coordination call at 3:00 pm to communicate the weather forecast, customers in scope and answer any questions regarding the PSPS event. SCE emailed the CPUC after the daily calls to provide the briefing material shared during the 2:00 pm call. SCE sent notifications to public safety partners at 3:07 pm, critical infrastructure customers at 8:07 pm, and customers at 8:29 pm with respect to circuits projected to be in scope for the event. At that point, weather forecasts indicated that up to 48 circuits and approximately 61,854 customers were potentially in scope for de-energization during the period of concern on October 26 through October 27.

October 25th -- SCE weather forecasts predicted strong Santa Ana winds starting on the morning of October 26 through October 27 impacting portions of Kern, Los Angeles, Orange, San Bernardino, Riverside, and Ventura counties. Although there had been cooler weather, light precipitation, and high humidity on October 24, this was not enough to dampen the fire potential forecast for Monday through Tuesday. Fuels in the forecasted PSPS areas were expected to dry out significantly by late Monday morning, establishing the period of concern beginning at 9:00 am, Monday, October 28. SCE provided an event update by email to the CPUC at 3:27 pm. SCE held its daily State Executive call at 2:00 pm, and an OEM County Coordination call at 3:00 pm. SCE sent notifications to public safety partners at 1:12 pm, critical infrastructure providers at 1:12 pm, and customers at 9:02 pm with respect to circuits projected to be in scope for the event. At that point, weather forecasts indicated that up to 55 circuits and approximately 71,068 customers were potentially in scope for de-energization during the period of concern on October 26 through October 27.

October 26th -- Although prior weather forecasts indicated the period of concern on October 26 beginning at 9:00 am, at approximately 6:00 am, the PSPS IMT began observing high wind speeds on SCE weather stations in Los Angeles, San Bernardino, and Orange counties that indicated early onset of dangerous weather conditions. For example, weather stations in the Valencia area measured wind speeds of up to 96 mph. Given the unanticipated early onset of these dangerous weather conditions,

⁴ The following event summary serves to provide an overview of the event. Additional details regarding specific PSPS requirements are addressed in further detail after this narrative.

the Incident Commander gave approval to start pro-active de-energization, with the actual first de-energization completed at 6:23 am on October 26. As a result, some customers did not receive imminent de-energization notification. Additionally, three circuits not originally in scope for the period of concern were de-energized when weather services advised that these circuits were exceeding wind and FPI thresholds. Details related to these circuits can be found in the table on page 6.

SCE provided an event update to the CPUC at 12:33 pm to notify of the de-energization of these circuits within Los Angeles, Orange, and San Bernardino County. SCE held its daily State Executive call at 2:00 pm, and an OEM County Coordination call at 3:00 pm to provide updates and address questions and/or concerns. As hazardous weather conditions subsided and the period of concern for circuits started ending that afternoon, SCE began sending imminent notifications of re-energization to public safety partners, critical infrastructure, and customers and started patrols for circuit restoration, ultimately restoring power to 10 circuits as detailed in the table on page 6.

October 27th -- At approximately 9:30am, SCE pro-actively de-energized an additional 2 circuits not originally forecasted to be in scope for the period of concern when weather services advised that both circuits were exceeding wind and FPI thresholds. Due to the rapid onset of these conditions, although SCE was not able to provide all advance notifications, SCE provided notice of imminent de-energization, imminent re-energization, and re-energization as detailed on page 9 of this report. The IMT continued to actively monitor weather developments, patrol de-energized circuits for possible restoration, and was able to restore circuits throughout the day. In total, SCE re-energized 32 circuits as detailed in the table on page 6.

SCE sent an update to the CPUC at 6:29 am to provide notice of the customers impacted by the PSPS de-energization broken down by county, and again at 5:10 pm to provide an update on restoration efforts and communicate the end of the period of concern. SCE held its daily State Executive call at 2:00 pm, and an OEM County Coordination call at 3:00 pm to provide updates on the end of the period of concern, intent to patrol lines as weather conditions permitted for the restoration of the remaining circuits, and address any questions and/or concerns.

October 28th -- SCE continued to perform post-event patrols and, after providing notice of imminent re-energization, restored power to 11 circuits by 3:24 pm. As circuits were re-energized, SCE provided imminent re-energization notifications throughout the day as detailed on page 9 of this report. SCE was unable to restore power to 2 circuits, Atento and Taiwan, which experienced impacts from the Silverado Fire and had access restrictions imposed by Orange County Fire Authority. Restoration of these circuits was transferred to the ES IMT managing the Silverado Fire on October 28. Both the Atento and Taiwan circuits were restored on 10/29.

The following responses address how SCE complied with all applicable PSPS regulatory requirements, including ESRB-8 and the Phase 1 (D. 19-05-042) and Phase 2 (D. 20-05-051) decisions, during this event.

1. The time, place and duration of the power shutoff event

This event started at 6:23 am on Monday, October 26, and continued through Wednesday, October 28 at 3:24 pm. The event impacted portions of Kern, Ventura, Los Angeles, San Bernardino, Orange, and Riverside counties. The table below provides the timeline for de-energization and restoration for all impacted circuits. Circuits that SCE could not fully restore within 24 hours of being cleared to begin patrol and restoration are denoted with a red asterisk and an explanation of the delay can be found on page 11 of this report.

VERA CRUZ	RAR2400	10/26/2020 12:07	27	N/A	10/27/2020 2:38

⁷ Given rapid onset of hazardous weather conditions, these circuits did not receive any notification prior to de-energization.

- 2. The local communities' representatives contacted prior to de-energization, the date on which they were contacted, and whether the areas affected by the de-energization are classified as Zone 1, Tier 2, or Tier 3 as per the definition in General Order 95, Rule 21.2⁸**

County	Public Safety Partner	Date	Tier
Los Angeles	County and State public safety and first responder agencies and local governments	10/23	Tier II, Tier III
Ventura	County and State public safety and first responder agencies and local governments	10/23	Tier II, Tier III
San Bernardino	County and State public safety and first responder agencies and local governments	10/23	Tier II, Tier III
Orange	County and State public safety and first responder agencies and local governments	10/23	Tier II, Tier III
Riverside	County and State public safety and first responder agencies and local governments	10/23	Tier II
Kern	County and State public safety and first responder agencies and local governments	10/23	Tier II

- 3. If unable to provide customers with notice at least 2 hours prior to the de-energization event, provide an explanation in its report.**

On October 26th SCE de-energized the Green River, Maciel, and Vera Cruz circuits without any prior notification as these circuits were not originally forecasted to be in scope for this event.

Additionally, some customers did not receive other types of notices as detailed in the table below.

⁸See Attachment A Public Safety Partner Notifications. SCE also contacted other County and State public safety and first responder agencies and local governments for areas that were not de-energized but were within the scope of concern.

4. Summarize the number and nature of complaints received as the result of the de-energization event and include claims that are filed due to de-energization.

As of the submission of this report, no formal complaints were submitted to the Commission or SCE Consumer Affairs. SCE received approximately 147 claims for this event as of November 10, 2020, with most of the claims alleging loss of food. Any complaints/claims received after submission of this report will be added to subsequent reports, as they are received and processed.

SCE received inquiries from the cities of Malibu and Simi Valley, as well as from the Acton Town Council, regarding notifications and other issues. One of the issues that caused confusion during this PSPS event was ongoing storm conditions causing some circuits to relay and de-energize during the same timeframe that other circuits were proactively de-energized due to PSPS events. As an example, Malibu experienced wind outages that were incorrectly messaged as PSPS outages during the event. In addition to questions about notifications, SCE also received questions from the Acton Town Council about SCE's weather forecasting and customer counts. SCE has met with representatives of Malibu and the Acton Town Council to discuss their concerns and will also meet with representatives of Simi Valley.

5. The timeline for power restoration (re-energization), in addition to the steps taken to restore power as required in Resolution ESRB-8.

A PSPS event will continue while dangerous fire weather conditions exist, and the threat of a catastrophic wildfire event remains due to these conditions. If circuits are shut off, those circuits and lines will be inspected to ensure there is no damage before power can be safely restored. Any visual inspection of the power lines must take place during daylight hours for safety and accuracy. Therefore, patrol and restoration operations may be limited or prolonged during overnight hours. SCE strives to restore all power within 24 hours of de-energization when possible.

As hazardous weather conditions subsided and the period of concern for circuits started ending on October 26, SCE performed post patrols for damage and restored power as detailed in the table on page 13. Given the additional ongoing fire activity, SCE moved the restoration responsibilities for the Taiwan and Atento circuits to the Electrical Services (ES) IMT responsible for restoration related to fire activity on October 28 at 07:30 am, as these two circuits were under restricted access from the Orange County Fire Authority. The Atento circuit was restored on October 29 at 11:53 am, and all customers on the Taiwan circuit were restored by October 29 at 12:22 am.

6. For any circuits that require more than 24 hours to restore, the utility shall explain why it was unable to restore each circuit within this timeframe in its post event report.

The Camp Baldy circuit could not be fully re-energized within 24 hours, as portions of the circuit are only accessible by hiking. Given these conditions, this patrol could not be completed in one day. Resources focused on patrolling the source line (Ferrara) and a portion of the Camp Baldy circuit, restoring all but 37 customers. However, due to nightfall and hazardous conditions, the patrol was postponed until the following day. The patrol resumed on 10/28 and all load was restored in the afternoon. The Icehouse circuit was also fed by the Ferrara circuit and is only accessible by hiking.

Resources focused on completing the Icehouse patrol during daylight on 10/28 and all load was restored that afternoon. All 12 customers remained de-energized more than 24 hours after it was safe to patrol and energize. The Rustic circuit could not be re-energized within 24 hours as a helicopter was required to complete the patrol and all helicopter patrols on October 26 and October 27 were cancelled due to wind until October 28. Of the 367 impacted customers on the Rustic circuit, only 20 were de-energized more than 24 hours after it was safe to patrol and energize. The Sand Canyon circuit could not be re-energized within 24 hours once it was safe to patrol and restore as a helicopter was also required to complete the patrol. However due to strong winds, the patrol was also postponed to 10/28. Of the 143 impacted customers, only 9 were de-energized more than 24 hours after it was safe to patrol and energize. The Atento circuit impacting 901 customers could not be energized within 24 hours as access was restricted by the Orange County Fire Authority due to the circuit being within the area evacuated because of the Silverado Fire. The Taiwan circuit impacting 85 customers could also not be energized within 24 hours as access was also restricted due to the Silverado Fire.

- 7. Identify the address of each community assistance location during the de-energization event, describe the location (in a building, a trailer, etc.), and describe the assistance available at each location, and give the days and hours that it was open.**

Each of the CRC/CCV locations were equipped with ice vouchers or ice, water, customer resiliency kit (containing PSPS program information, mask, gloves, hand sanitizer, solar power battery charger or an LED light with built-in battery).

CRC/CCV Locations and Details

Type	County	City/Community	Day and Time ⁹	Address
CCV	San Bernardino	San Bernardino, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	CSU San Bernardino, 5500 University Pkwy
CCV	San Bernardino	Rancho Cucamonga, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	Central Park, 11200 Baseline Rd.
CRC	Orange	Orange, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	Sears, 2100 N. Tustin St
CRC	San Bernardino	Fontana, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	Jesse Turner Health and Fitness Fontana Community Center 15556 Summit Ave
CRC	Los Angeles	Acton, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	Acton Community Center, 3748 Nickels S
CRC	Riverside	Cabazon, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	James A. Venable Community Center, 50390 Carmen Ave
CRC	Los Angeles	Agua Dulce, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	Agua Dulce Women's Club, 33201 Agua Dulce Canyon Rd

⁹ CRC/CCV operation coincided with the period of concern in each area, which resulted in actual hours of operation that are different from the CRC/CCV available hours.

Type	County	City/Community	Day and Time ⁹	Address
CRC	Ventura	Moorpark, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	Boy's and Girl's Club of Moorpark, 200 Casey Rd.
CRC	Ventura	Simi Valley, CA	9am-10pm (Monday) 9am-12pm (Tuesday)	Boy's and Girl's Club of Simi Valley, 2850 Lemon Dr
CRC	Los Angeles	Canyon Country	9am-10pm (Monday) 9am-12pm (Tuesday)	College of the Canyons, 1700 Sierra Hwy

8. Any wind-related damage(s) to SCE's overhead equipment in the areas where power is shutoff.

Crews performed post-patrols on de-energized circuits before re-energization to ensure safe operating conditions. Repairs were made before safely restoring power. A summary of all wind-related damage from this PSPS event found during the post-patrol process is below:

Circuit	Structure	Damage
Acosta	1499799E, 1388833E, 4234971E	Damaged insulators, broken pole

9. All factors considered by SCE in its decision to shut off power, including wind speed, temperature, humidity, and vegetation moisture in the vicinity of the de-energized circuits

SCE's decision to shut off power is dynamic and was made by considering the following factors during this event:

- National Weather Service-issued watches and warnings for high fire risk areas in our territory
- Ongoing assessments from our in-house meteorologists using high-resolution weather models, data from SCE weather stations, and publicly available weather stations
- The SCE Fire Potential Index (FPI), a tool that utilizes weather data, fuel conditions, and vegetation moisture content to rate the daily fire potential across our region. SCE uses the following metrics to rate ignition potential: Low-11.99, Elevated-12-14.99 and Extreme-15 and above.
- Wind trends and speeds, particularly when they exceed or are expected to exceed National Weather Service Wind Advisory levels (defined as 31 mph sustained wind speed and 46 mph gust wind speed) or exceed the top 1% of historical wind speeds in the area. Wind speeds are particularly important when we consider them in combination with other local conditions, such as dry vegetation, that could present an imminent hazard for the community. Wind speed thresholds may also be adjusted based on other factors or circuit design
- Other operational considerations, such as the state of the potentially impacted circuits, flying debris and/or downed wires

SCE considered the following specific factors to inform de-energization decisions:

Circuit Name	RAR/CB	Weather Station	Wind Sustained	Gust Sustained	Threshold Sustained	FPI Value	Reasons for De-Energization

10. Evaluation of alternatives to de-energization that were considered, and mitigation measures used to decrease the risk of utility-caused wildfire in the de-energized area and an explanation of how the utility determined that the benefit of de-energization outweighed the potential public safety risks:

SCE does not perform separate risk assessments to establish de-energization thresholds during each PSPS event, but rather incorporates known risks and sets thresholds based on SCE's risk-informed assessment of the potential for a catastrophic wildfire should an ignition occur under the conditions presented. Under such conditions, the harm to life and property resulting from a catastrophic wildfire vastly outweighs the impacts of the de-energization necessary to eliminate the potential of ignition. Additionally, SCE only uses de-energization when no other alternatives will mitigate this fire risk and SCE further minimizes the impact by limiting the de-energization to the smallest number of customers possible through segmentation of impacted circuits, where possible.

During this event, SCE used sectionalizing through RAR devices or switches to isolate and de-energize only the necessary portions of circuits. While avoiding de-energization entirely was not possible, SCE took steps to reduce the impacts of de-energization on the community and considered the impacts of the de-energization on its stakeholders within the context of the risk posed by the prevailing weather conditions, its de-energizations thresholds, and the unacceptable public safety risk of catastrophic wildfire ignition. SCE also considers the use of back-up generation when customer conditions warrant. For example, a back-up generator was deployed to a customer in hospice care on the Atento circuit at 2:35 pm on October 28 to help mitigate initial impacts from the de-energization event and ongoing impacts from the Silverado Fire.

11. A copy of all notifications, the timing of notifications, the methods of notifications and who made the notifications (the utility or local public safety partners).

A copy of all notifications and the timing of notifications can be found in Attachment A - Public Safety Partner Notifications, Attachment B - Critical Infrastructure and Customer Notifications, and Attachment C - PSPS Activation Customer Notification Messaging.

All PSPS event notifications to key stakeholders, including Public Safety Partners and customers, are delivered via voice, email, and TTY (telecommunication device for the hearing impaired) formats as per the preference of the recipient. Notifications are offered in multiple languages. All notifications were made by SCE.

12. Number of affected customers broken down by all classifications including residential, medical baseline, commercial/industrial, etc.

A detailed description of the number of affected customers broken down by all classifications including residential, medical baseline, commercial/industrial, etc. is provided in Attachment B - Customer and Critical Infrastructure Notifications.

13. An explanation of the circumstances that resulted in failure to communicate a potential pro-active de-energization event, if any.

Although prior weather forecasts indicated the period of concern on October 26 beginning at 9:00 am, at approximately 6:00 am, the PSPS IMT began observing high wind speeds on SCE weather stations in Los Angeles, San Bernardino, and Orange counties that indicated early onset of dangerous weather conditions. For example, weather stations in the Valencia area measured wind speeds of up to 96 mph. Given the unanticipated early onset of these dangerous weather conditions, the Incident Commander gave approval to start pro-active de-energization, with the actual first de-energization completed at 6:23 am on October 26. As a result, some customers did not receive imminent de-energization notification. Additionally, three circuits not originally in scope for the period of concern were de-energized without prior notification when weather services advised that these circuits were exceeding wind and FPI thresholds. Details related to these circuits can be found in the table on page 6.

14. Each electric investor-owned utility shall enumerate and explain the cause of any false communications in its post event reports by citing the sources of changing data.

SCE notes that its PSPS notices before potential de-energization only provide a warning to customers of a possible de-energization event. SCE notices are designed to give customers notice that a de-energization could take place and a time frame within which the event is most likely to occur so that customers can act and prepare. Given the unpredictability of weather on the ground, however, SCE's advance notices do not affirmatively confirm that a circuit *will be* de-energized. In fact, for clarity, SCE does not provide any affirmative confirmation of de-energization in its notifications until an actual de-energization has taken place.

SCE believes this event could be viewed as an example of a false-negative communication since we were unable to provide all of the required advance notice of de-energization to Public Safety Partners, critical infrastructure providers, or customers on 3 circuits during this event given the rapid onset of hazardous weather conditions.

15. A description and evaluation of engagement with local and state public safety partners in providing advanced education and outreach during the de-energization event.

Advanced education and outreach of this Public Safety Power Shutoff event was communicated to all impacted county emergency management officials, CalOES, and the Commission before any forecasted weather was scheduled to impact the SCE service territory. Regular updates were provided throughout the event using the CalOES PSPS Notification Form, daily situational awareness and coordination calls, and individual contact with Public Safety Partners in the affected counties. SCE also hosted an Agency Representative from CalOES during this event.

16. For those customers where positive or affirmative notification was attempted, an accounting of the customers (which tariff and/or access and functional needs population designation), the number of notification attempts made, the timing of attempts, who made the notification attempt (utility or public safety partner) and the number of customers for whom positive

notification was achieved.

SCE only tracks critical care customers for positive or affirmative receipt of notification attempts. Notifications are made daily as these customers remain on potentially impacted circuits. There were 14 critical care customers requiring secondary verification during this PSPS event and SCE was able to make positive contact with all of them during this event. SCE regularly requests updated contact information from all critical care customers.

17. A description of how sectionalizing, i.e., separating loads within a circuit, was considered and implemented and the extent to which it impacted the size and scope of the de-energization event.

There were approximately 67,957 total customers in potential scope for actual de-energization during the period of concern for this event across all known circuits. There were an additional 9,640 customers not in the period of concern that SCE had to ultimately de-energize. SCE reduced the number of customers impacted by de-energization to 36,037 customers using switching playbooks that identified sectionalizing devices to limit the scope of the event. SCE used an RAR device to separate and isolate the de-energization areas, limiting the de-energization impacts as detailed in the table on page 6 of this report. During the process of sectionalizing, 334 customers temporarily lost power (for approximately 1 minute) but SCE is not including this in the count of de-energized customers due to the fact that this was an extremely short loss of power during switching operations and the customers at issue were not actually impacted by the PSPS events.

18. Lessons learned from the de-energization events.

As the unexpected changes in weather associated with this event highlight, it is important to continue to develop practices aimed at improved weather forecasting while also enhancing IMT practices and protocols, to enhance our ability to provide notifications even in unexpected weather events. SCE is continuing to evaluate lessons learned from this event and is also considering potential improvements to the existing IMT processes and procedures to increase the time period between when the IMT begins monitoring for potential weather ahead of the period of concern and when the period of concern actually begins. This will allow the PSPS IMT more time to make necessary notifications and further evaluate de-energizations decisions.

19. Any recommended updates to the guidelines adopted in Resolution ESRB-8 and this decision.

As SCE explained in its prior report, we would appreciate clarification related to “false negative” and “false positive” communications presented in D.20-05-051. SCE notes that “false positives or negatives” typically refer to decisions made or actions taken based on erroneous information. Differences between notifications and actual de-energizations, however, do not stem from incorrect data, but rather from actual ground conditions varying from forecast conditions, as is the case with every weather forecast. This variance is inherent because of the constantly changing nature of emergent weather.

SCE also believes that the relevant timeframe for assessing the numbers of customers who received notification but did not get de-energized/re-energized or who were de-energized

without notification should be limited to imminent notification made within 1-4 hours of a de-energization event or actual de-energization without notice. Weather conditions during PSPS events are dynamic and can change very quickly, and 1-, 2-, or 3-day advance notifications inherently have significant variability built in. It is not clear if any and all notifications of potential PSPS would be considered to be a false positive, or if this would be limited to instances when a customer receives notification that PSPS is imminent but is not actually de-energized.

The same clarification would be appreciated on false negative communications, *i.e.*, de-energizations without 1-4-hour notice. SCE recommends that only (1) imminent de-energization notices (1-4 hours) when de-energization does not take place; (2) imminent re-energization notices when no re-energization took place within the period of time indicated in the notice; or (3) de-energization without any notice be considered in the context of reporting false positive and false negative notifications. SCE hopes that the Commission will take this into consideration when clarifying the definition of false positives and negatives going forward.

SCE PSPS Post Event Report
October 23 to October 28, 2020

Officer Verification

I am an officer of the applicant corporation herein and am authorized to make this verification on its behalf. I am informed and believe that the matters stated in the foregoing document are true.

I declare under penalty of perjury that the foregoing is true and correct.

Executed this 12th day of November 2020 in Cerritos, California

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to projected weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in Los Angeles County. SCE is also notifying customers on the affected circuits about the potential shutoff, giving them time to prepare.

SCE has opened its Emergency Operations Center and activated an Incident Management Team to monitor the weather and other conditions in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Please refer to the attached file for status and periods of concern for specific circuits in your county.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: SCE may shut off power on one or more circuits in your area. For more information, visit sce.com/PSPS.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **Los Angeles County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit sce.com/PSPS.

Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at sce.com/maps.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit sce.com/PSPS.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to projected weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **Kern County**. SCE is also notifying customers on the affected circuits about the potential shutoff, giving them time to prepare.

SCE has opened its Emergency Operations Center and activated an Incident Management Team to monitor the weather and other conditions in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Please refer to the attached file for status and periods of concern for specific circuits in your county.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: SCE may shut off power on one or more circuits in your area. For more information, visit sce.com/PSPS.

Subject: Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) UPDATE for Los Angeles County.
Date: Sunday, October 25, 2020 8:42:53 PM
Attachments: [SCE+LNO+POC+2020-10-25+UPDATE+Los+Angeles+County+Rpt+2.xlsx](#)

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **Los Angeles County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit sce.com/PSPS.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in **Los Angeles County**. Impacted circuits and locations are:

- **Circuit:** Sand Canyon
- **County:** Los Angeles County
- **Incorporated City of:** Santa Clarita
- **Unincorporated County Area:** Agua Dulce Canyon ; Mint Canyon south of Mint Canyon Elementary school going south on Sand Canyon Rd ; Sand Canyon ; Soledad Canyon ; Long Canyo ; Russ ; Lang ; Magic Mountain ; North Fork Ranger Station Water Pump
- **De-Energized Date:** 10/26/20
- **De-Energized Time:** 0625

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in **Los Angeles County**. Impacted circuits and locations are:

- **Circuit:** Shovel
- **County:** Los Angeles County
- **Incorporated City of:** Palmdale
- **Unincorporated County Area:** Escondido Canyon Rd between Aqua Dulce Canyon and Acton ; Kashmere Canyon ; Boiling Point
- **De-Energized Date:** 10/26/20
- **De-Energized Time:** 0649

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Public Safety Power Shutoff (PSPS) Occurred in San Bernardino County at 0746.

Follow Up Flag: Follow up
Flag Status: Completed

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in **San Bernardino County**. Impacted circuits and locations are:

- **Circuit: Calstate (Segment 1)**
- **County: San Bernardino County**
- **Incorporated City of: San Bernardino**
- **Unincorporated County Area: Devils Canyon**
- **De-Energized Date: 10/26/20**
- **De-Energized Time: 0746**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Imminent Public Safety Power Shutoff (PSPS) in Orange County.

Importance: High

Follow Up Flag: Follow up
Flag Status: Completed

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit:** NEPAL
- **County:** Orange County
- **Incorporated City of:** Orange
- **Unincorporated County Area:** ORANGE PARK ESTATES ; Lolita St

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Imminent Public Safety Power Shutoff (PSPS) in San Bernardino County.

Follow Up Flag: Follow up
Flag Status: Completed

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: Acosta**
- **County: San Bernardino County**
- **Incorporated City of: Fontana; Rancho Cucamonga**
- **Unincorporated County Area: San Sevaine Flats**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Public Safety Power Shutoff (PSPS) Occurred in Riverside County at 0832 and 0838.

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in **Riverside County**. Impacted circuits and locations are:

- Circuit: **Rustic (Segment 5)**
- County: **Riverside County**
- Unincorporated County Area: **Santiago Peak**
- De-Energized Date: **10/26/20**
- De-Energized Time: **0832 (portion of segment 5) and 0838 (portion of segment 5)**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Public Safety Power Shutoff (PSPS) DE-EN Occurred in Los Angeles Co at 0905.

Importance: High

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in Los Angeles County. Impacted circuits and locations are:

- Circuit: LOPEZ (another portion of the circuit)
- County: Los Angeles
- Incorporated City of: San Fernando
- Unincorporated County Area: Indian Springs, El Merrie Dell
- De-Energized Date: 10/26/20
- De-Energized Time: 0905

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: Gowan**
- **County: Riverside County**
- **Incorporated City of: Jurupa Valley**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Imminent Public Safety Power Shutoff (PSPS) in Ventura County.

Importance: High

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: Big Rock**
- **County: Ventura County**
- **Incorporated City of: Simi Valley**
- **Unincorporated County Area: Santa Susana Knolls**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: Cholla**
- **County: San Bernardino County**
- **Unincorporated County Area: Morongo Valley**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize

information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Public Safety Power Shutoff (PSPS) Occurred in Los Angeles County at 0905.
Date: Monday, October 26, 2020 10:38:47 AM

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in **Los Angeles County**. Impacted circuits and locations are:

- **Circuit:** Lopez
- **County:** Los Angeles County
- **Incorporated City of:** San Fernando
- **Unincorporated County Area:** Indian Springs ; El Merrie Dell
- **De-Energized Date:** 10/26/20
- **De-Energized Time:** 0905

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other

unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- Circuit: **Cooler**
- County: **Orange County**
- Incorporated City of: **Lake Forest, Mission Viejo, Rancho Santa Margarita**
- Unincorporated County Area: **Unincorporated communities near Rancho Santa Margarita**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Imminent Public Safety Power Shutoff (PSPS) in Orange County.

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: Green River**
- **County: Orange County**
- **Incorporated City of: Yorba Linda**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in Riverside County. Impacted circuits and locations are:

- Circuit: GOWAN
- County: Riverside
- Incorporated City of: Jurupa Valley
- Unincorporated County Area: None.
- De-Energized Date: 10/26/20
- De-Energized Time: 1122

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: Taggart**
- **County: San Bernardino County**
- **Unincorporated County Area: Green Valley Lake ; Running Springs ; Crab Flats**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Web and Maps

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: Twin Peaks**
- **County: San Bernardino County**
- **Unincorporated County Area: Crestline ; Crestline Lake Arrowhead Water Agency**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **Kern County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit sce.com/PSPS.

Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at sce.com/maps.

Subject: Important SCE information – Public Safety Power Shutoff (PSPS) Re-Energization for CANEBRAKE circuit in Kern County

Importance: High

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- Circuit: **CANE BRAKE**
- County: **Kern**
- Unincorporated County Area: **Canebrake or Onyx or Weldon**
- Re-Energized Date: **10/26/2020**
- Re-Energized Time: **18:34**

SCE will notify customers when power has been turned back on. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in Ventura County. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit sce.com/PSPS.

Web and Maps

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- Circuit: **ANTON**
- County: **Ventura County**
- Incorporated City of: **Moorpark**
- Unincorporated County Area: **North of Moorpark**
- Re-Energized Date: **10/26/2020**
- Re-Energized Time: **20:08**

- Circuit: **TWIN LAKES**
- County: **Ventura County**
- Incorporated City of: **Simi Valley**
- Re-Energized Date: **10/26/2020**
- Re-Energized Time: **20:26**

SCE will notify customers when power has been turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Subject: Important Information from SCE – Imminent Public Safety Power Shutoff (PSPS) of JEEP circuit in San Bernardino County

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- Circuit: **JEEP (Segment 1)**
- County: **San Bernardino County**
- Unincorporated County Area: **Lake Arrowhead**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Public Safety Power Shutoff (PSPS) Occurred in San Bernardino County at 2227

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in **San Bernardino County**. Impacted circuits and locations are:

- Circuit: **JEEP (Segment 1)**
- County: **San Bernardino County**
- Unincorporated County Area: **Lake Arrowhead**
- De-Energized Date: **10/26/20**
- De-Energized Time: **22:27**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- Circuit: **COOLER**
• County: **Orange County**
• Incorporated Cities of: **Lake Forest; Mission Viejo; Rancho Santa Margarita**
• Unincorporated County Area:**Unincorporated communities near Rancho Santa Margarita**

- Circuit: **GREEN RIVER**
• County: **Orange County**
• Incorporated City of: **Yorba Linda**

- Circuit: **MODJESKA**
• County: **Orange County**
• Incorporated City of: **Rancho Santa Margarita**
• Unincorporated County Area: **East of Dove Canyon**

- Circuit: **SIAM**
• County: **Orange County**
• Incorporated City of: **Orange**
• Unincorporated County Area: **El Modena ; Cowan Heights ; Orange Park Acres**

- Circuit: **VERA CRUZ**
• County: **Orange County**
• Incorporated City of: **Brea; Placentia; Yorba Linda**
• Unincorporated County Area: **Carbon Canyon**

SCE will also begin notifying customers that power will be turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE

relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: SCE will begin turning power back on in your area. SCE has inspected its electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- Circuit: **BIG ROCK**
- County: **Los Angeles County**
- Unincorporated County Area: **West of Lakeside Park**
- Re-Energized Date: **10/27/2020**
- Re-Energized Time: **01:06**

- Circuit: **BIG ROCK**
- County: **Ventura County**
- Incorporated City of: **Simi Valley**
- Unincorporated County Area: **Santa Susana Knolls**
- Re-Energized Date: **10/27/2020**
- Re-Energized Time: **01:06**

SCE will notify customers when power has been turned back on. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Subject: Important SCE information – Public Safety Power Shutoff (PSPS) Re-Energization of CABANA circuit in Riverside and San Bernardino Counties

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- Circuit: **CABANA**
 - County: **Riverside County**
 - Incorporated City of: **Jurupa Valley**
 - Re-Energized Date: **10/27/2020**
 - Re-Energized Time: **03:58**
-
- Circuit: **CABANA**
 - County: **San Bernardino County**
 - Incorporated City of: **Fontana**
 - Re-Energized Date: **10/27/2020**
 - Re-Energized Time: **03:58**

SCE will notify customers when power has been turned back on. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Subject: Important Information from SCE – Imminent Public Safety Power Shutoff (PSPS) in Riverside County.

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: BLACKHILLS**
- **County: Riverside County**
- **Incorporated City of: Jurupa Valley**

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Subject: Important SCE information – Imminent Public Safety Power Shutoff (PSPS) Re-Energization in progress in Los Angeles County.

Follow Up Flag: Follow up
Flag Status: Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- **Circuit: SAND CANYON**
- **County: Los Angeles**
- **Incorporated City of: Santa Clarita**
- **Unincorporated County Area:** Agua Dulce Canyon; Mint Canyon south of Mint Canyon Elementary school going south on Sand Canyon Rd; Sand Canyon; Soledad Canyon; Long Canyo; Russ; Lang; Magic Mountain; North Fork Ranger Station Water Pump

SCE will also begin notifying customers that power will be turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: SCE will begin turning power back on in your area. SCE has inspected its electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in Riverside County.

Impacted circuits and locations are:

- Circuit: BLACKHILLS
- County: Riverside County
- Incorporated City of: Jurupa Valley
- Unincorporated County Area: Rubidoux ; Camino Real Elementary School ; Rustic Lane Elementary School
- De-Energized Date: 10/27/20
- De-Energized Time: 0922

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

Subject: Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) UPDATE for San Bernardino County.
Attachments: SCE+LNO+POC+SAN+BERNARDINO+2020-10-27+Rpt+1.xlsx

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **San Bernardino County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit sce.com/PSPS.

Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at sce.com/maps.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- Circuit: AVANTI
- County: San Bernardino
- Incorporated City of: San Bernardino
- Unincorporated County Area: Verdemont ; University Heights

SCE will also begin notifying customers that power will be turned back on. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: SCE will begin turning power back on in your area. SCE has inspected its electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **PARTIALLY RE-ENERGIZE** the following circuit(s):

- **Circuit: ENERGY**
- **County: Los Angeles**
- **Incorporated City of:**
- **Unincorporated County Area: Chatsworth; Fern Ann Falls; Twin Lakes; Deer Lake Highlands; Chatsworth Lake Manor; Oat Mountain Rd to Santa Susana Mountains**
- **Re-Energized Date: 10/27**
- **Re-Energized Time: 11:02 (Partial)**

SCE will notify customers when power has been turned back on. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- **Circuit: KIMBERLY**
- **County: San Bernardino**
- **Unincorporated County Area: Rim of the World**

SCE will also begin notifying customers that power will be turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: SCE will begin turning power back on in your area. SCE has inspected its electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at sce.com/maps.
- Information about SCE's Public Safety Power Shutoff (PSPS) program is at sce.com/PSPS.
- Access SCE's non-PSPS outage information page at sce.com/outages.
- Access information on weather conditions at sce.com/fireweather.
- SCE's post-PSPS reports are available at sce.com/pСПS.

How to Contact Us

- **First Responders and Emergency Managers: Please DO NOT share this information with the public.**
 - SCE Business Resiliency Team

- Business Resiliency Duty Manager hotline is **(800) 674-4478**. This is a 24/7 phone line that can be used outside of PSPS events as well as during activations.
 - BusinessResiliencyDutyManager@sce.com. The Business Resiliency Duty Manager mailbox is only monitored during activations.
- **Public Officials: Please DO NOT share this information with the public.**
 - SCE Liaison Officer (LNO)
 - LNO hotline is 800-737-9811. This 24/7 phone line is for use by local government and tribal officials only and it's monitored only during emergency activations.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- **Circuit: CAMP BALDY**
- **County: Los Angeles**
- **Unincorporated County Area: Pearblossom**

SCE will also begin notifying customers that power will be turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Subject: Important SCE information – Public Safety Power Shutoff (PSPS) Re-Energization in San Bernardino County.

Follow Up Flag: Follow up
Flag Status: Completed

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- **Circuit: VERDEMONT**
- **County: San Bernardino**
- **Incorporated City of: San Bernardino**
- **Unincorporated County Area: Muscoy; Keenbrooke; Cosy Dell; Cajon**
- **Re-Energized Date: 10/27**
- **Re-Energized Time: 07:56**

SCE will notify customers when power has been turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Subject: Important SCE information – Public Safety Power Shutoff (PSPS) Re-Energization in San Bernardino County.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- **Circuit: IMPALA**
- **County: San Bernardino**
- **Incorporated City of: Fontana**
- **Re-Energized Date: 10/27**
- **Re-Energized Time: 1808**

SCE will notify customers when power has been turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected any lines that were de-energized due to PSPS, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** all circuits in your county. SCE's Incident Management Team is standing down and both SCE systems and staff have returned to normal status.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: The power shutoff in your area has concluded. Customers in this area, however, may experience other weather-related or unplanned repair outages not related to the Public Safety Power Shutoff (PSPS). Check your email for details and visit sce.com/PSPS.

Subject: Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) UPDATE for San Bernardino County.
Attachments: SCE+LNO+POC+SAN+BERNARDINO+2020-10-27+Rpt+2.xlsx

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **San Bernardino County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit sce.com/PSPS.

Subject: Important SCE information – Public Safety Power Shutoff (PSPS) Re-Energization in San Bernardino County.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- **Circuit: CAMP BALDY**
- **County: San Bernardino**
- **Unincorporated County Area: Mt. Baldy**
- **Re-Energized Date: 10/27**
- **Re-Energized Time: 1949**

SCE will notify customers when power has been turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Subject: Important SCE information – Imminent Public Safety Power Shutoff (PSPS) Re-Energization in progress in San Bernardino Co.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- Circuit: MACIEL
- County: San Bernardino
- Incorporated City of: Chino Hills
- Unincorporated County Area: none

SCE will also begin notifying customers that power will be turned back on. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: SCE will begin turning power back on in your area. SCE has inspected its electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Subject: Important SCE information – Public Safety Power Shutoff (PSPS) Re-Energization in San Bernardino County.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- Circuit: ACOSTA
- County: San Bernardino
- Incorporated City of: Fontana, Rancho Cucamonga
- Unincorporated County Area: San Sevaine Flats
- Re-Energized Date: 10/28/20
- Re-Energized Time: 0834

SCE will notify customers when power has been turned back on. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Subject: Important SCE information – Public Safety Power Shutoff (PSPS) Re-Energization in Los Angeles County.

Please click here to acknowledge receipt of this message

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- **Circuit: DAVENPORT**
- **County: Los Angeles**
- **Unincorporated County Area: Agua Dulce; Southwest of Agua Dulce; Boiling Point; White Heather; Sleepy Valley; Northeast of Forest Park; The Oaks**
- **Re-Energized Date: 10/27**
- **Re-Energized Time: 1139**

SCE will notify customers when power has been turned back on. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit sce.com/PSPS.

Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at sce.com/maps.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- Circuit: CLUB OAKS
- County: San Bernardino
- Incorporated City of: San Bernardino
- Unincorporated County Area: Valley View Park; Skyland
- Re-Energized Date: 10/28
- Re-Energized Time: 1502

A notification sent 10/27 at 18:56 should have said PARTIAL Re-Energization. This notice is correctly denoting that a full Re-Energization has occurred.

SCE will notify customers when power has been turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

Subject: Important SCE information – Public Safety Power Shutoff (PSPS) EVENT CONCLUDED in ORANGE County.
Attachments: SCE+LNO+POC+ORANGE+2020-10-28+Rpt+1.xlsx

Please click here to acknowledge receipt of this message

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected any lines that were de-energized due to PSPS, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** all circuits in your county. SCE's Incident Management Team is standing down and both SCE systems and staff have returned to normal status.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: The power shutoff in your area has concluded. Customers in this area, however, may experience other weather-related or unplanned repair outages not related to the Public Safety Power Shutoff (PSPS). Check your email for details and visit sce.com/PSPS.

Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at sce.com/maps.
- Information about SCE's Public Safety Power Shutoff (PSPS) program is at sce.com/PSPS.
- Access SCE's non-PSPS outage information page at sce.com/outages.
- Access information on weather conditions at sce.com/fireweather.
- SCE's post-PSPS reports are available at sce.com/pСПS.

How to Contact Us

- **First Responders and Emergency Managers: Please DO NOT share this information with the public.**
 - SCE Business Resiliency Team
 - Business Resiliency Duty Manager hotline is **(800) 674-4478**. This is a 24/7 phone line that can be used outside of PSPS events as well as during activations.
 - BusinessResiliencyDutyManager@sce.com. The Business Resiliency Duty Manager mailbox is only monitored during activations.
- **Public Officials: Please DO NOT share this information with the public.**
 - SCE Liaison Officer (LNO)
 - LNO hotline is 800-737-9811. This 24/7 phone line is for use by local government and tribal officials only and it's monitored only during emergency activations.

- SCELiaisonOfficer@sce.com. The LNO mailbox is for use by local government officials and only monitored during emergencies or PSPS activations.
- **Members of the Public: Please DO share this information with your residents on your website or social media.**
 - 800-611-1911 is for outage-specific Customer Service issues.

Voice/ Voice Mail/TTY:

This is an important safety message from Southern California Edison. Due to forecast fire weather conditions, SCE is exploring a potential Public Safety Power Shutoff of electrical lines in the ^city_variable^ area. These conditions may result in SCE turning off your power. SCE anticipates that this may occur on ^Day of week^^Month Day^ though it may occur earlier or later depending on actual weather conditions. We encourage you to prepare by having your resiliency plan ready to execute. SCE will send daily updates until conditions improve. For additional information available, please contact your assigned SCE account representative, go to SCE.com/pssps, or call SCE at 1-800-611-1911.
